

# The Dell Loy Hansen Family Foundation School Support Program

The Dell Loy Hansen Family Foundation has a goal to create opportunities of giving through sustainability. Our work with the Granite School District is a great model to showcase how businesses or foundations can work with local schools and districts to create sustainable programs of giving.

**1** **The Dell Loy Hansen Family Foundation** met with the Granite School District and identified areas where there was a lack of funding.

**2** **Areas of need** - Identify areas of need. Ex. Food Insecurity

**3** **Identity Questions** - What is the need? What has been done to try and address the need? How might additional funds and resources help solve the issue?

**4** **Ideation and Collaboration with School District** - Create options to test for success. Ex. Creating a pantry closet in each school that is stocked weekly for students who have a need.

**5** **Launch** - Ensure good communication and expectations! Review programs often to make adjustments and ensure success.
